# SENGKHUN LIM

## SUMMARY

An accomplished Full Stack developer with over 4 years of experience in software development and exceptional problem-solving abilities.

Possessing comprehensive expertise in React and React Native, and a strong command of backend development using ExpressJS, GraphQL, MongoDB, and Firebase.

Highly proficient in leveraging Google Cloud Services and Monitoring tools to optimize DevOps practices.

Extensive experience in developing cutting-edge solutions for the healthcare, sports, and food industries.

Passionate about exploring new technologies and continuously applying expertise to deliver exceptional professional work.

## WORK EXPERIENCE

**Jul 2021 - Present**

**Full Stack Developer**
Bigwig Agency, Australia

Key Responsibilities:
- Developing a mobile application and an admin web portal for a prominent hospital in South Australia, utilizing React and React Native.
- Building a robust backend server using ExpressJS, Firestore and Google Cloud Service to support the app and web portal's functionalities.
- Integrating APIs from third-party companies into the existing system as per the client's requirements.
- Designing and implementing APIs to facilitate seamless communication between the mobile application, the admin web portal and third-party companies, adhering to specific client specifications.
- Producing end-user documentation to facilitate user understanding and efficient utilization of the developed solutions.

**Aug 2018 - Jan 2020**

**Project Lead and Full Stack Developer**
TK CAPITAL PLC., Cambodia

Key Responsibilities:
- Analyzed the business flow to ensure customer requirements are met effectively.
- Providing training and supervision to the team to achieve high efficiency and performance.
- Assisted team members to develop a full-stack solution using React and React Native for the frontend, Express JS for the backend server, and MongoDB for the database, including designing the database structure and implementation.

Key Achievements:
- Deployed robust delivery management platforms, ensuring seamless operations.
- Reduced delivery process time by 40%, optimising efficiency.

**Apr 2017 - Mar 2019**

**Backend Developer & Co-Founder**
GoSoccer, Cambodia

Key Responsibilities:
- Implemented server architecture using ExpressJS, MongoDB, and GraphQL.
- Designed and optimized database structures and diagrams.
- Led team in meeting deadlines and following Scrum management principles.

Key Achievements:
- SmartStart Young Innovative Program: Top 5 winner.
- Grand Final Competition Winner: Visited Google, Facebook, Microsoft, and LinkedIn in Singapore.
- GoSoccer app: Top 10 most downloaded in Sport Category within one week.
